About

I'm a software engineer, I'm passionate about developing backend services but I'm also curious about the frontend, cutting-edge technologies are my horizon. I really believe that R&D are the gas of our society.

I'm responsible for designing and implementing highly responsive server-side logic as well as developing the application program interface between the frontend and backend layers.

I have skills using agile methodologies like Scrum or Kanban. If you need to know if I like teamwork, well I just have to tell you that two or more heads are better than one.

SKILLS

- Software Development (advance):

1. Data structures knowledge (linked list, stacks, queue and trees).
2. SOLID, KISS, DRY, YANGNI principles.
3. OOP, functional and structured programming.
4. Unix like development environment.
5. Domain Driven Design.
6. Test Driven Development.
7. Behavior Driven Development.
8. Docker, kubernetes.
9. Jenkins CI/CD pipelines.
10. QA code Sonarqube.

- Backend (advance):

1. Go.
2. Javascript(backend).
3. API REST.
4. GraphQL.
5. Kafka Event based architecture.

- Frontend (basics):

1. React
2. Vue

- Databases (intermediate):

1. PostgreSQL, MariaDb/Mysql.
2. MongoDb, Redis, Cassandra, Dynamodb.

EXPERIENCE

Rappi

Sr. Software Developer

Dec. 2019 - Present

I work designing and implementing features for services related assignments in the core of the business.

Merqueo

Sr. Software Developer

June. 2019 - Dec. 2019

I worked designing and implementing server-side services for the packaging logistics department.

Sophos Solutions S.A.S.

Sr. Software Developer

July. 2018 - June. 2019

I worked designing and implementing a software to generate synthetic data that was used to validate the functionality of the virtual office web application.

Quick Help

Mini Squad Lead

March. 2018 - July. 2018

I worked designing and implementing REST server-side logic and leading the backend team.

Gases Industriales de los Santanderes S.A.S Software Engineer

Software Developer(Freelancer)

Oct. 2016 - Feb. 2018

I worked designing and implementing a software to track the position of the industrial compressed gas cylinders.

Graduation Research

Software Engineer

Apr. 2016 - Dec. 2017

I worked designing and implementing a javascript framework for development of web applications.

Comcerge s.a.s

Software Developer(Freelancer)

Jan. 2016 - June. 2016

I worked designing and implementing a software to do the census of the Simití Bolívar town population within the framework of study of priority health care in the region.

Hospital Local La candelaria

Software Developer(Freelancer)

May. 2015 - Dec. 2015

I worked designing and implementing a software to generate payment orders for external contractors.

Education

Universidad Popular Del Cesar
Systems Engineer
2017
